Silver gelatin	#9DA2A4	Reference only — infer colors cautiously
Archival ivory	#EEE4D1	Reference only — infer colors cautiously
Warm sepia	#8D6A4C	Reference only — infer colors cautiously
Charcoal	#25313B	Reference only — infer colors cautiously
Muted denim	#637E91	Reference only — infer colors cautiously
Vintage olive	#777A58	Reference only — infer colors cautiously
Soft skin warmth	#D8A884	Reference only — infer colors cautiously
Faded burgundy	#875D5B	Reference only — infer colors cautiously

01–50: Repair damage and retain the original photographic color or monochrome. **51–100:** Convert black-and-white photographs into believable, historically sensitive color interpretations.

PART ONE / PHOTO RESTORATION

001. Fine Hairline Scratches / Scratches & Surface Wear

Restore an old photograph affected by fine hairline scratches. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

002. Long Diagonal Scratches / Scratches & Surface Wear

Restore an old photograph affected by long diagonal scratches. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

003. Dense Surface Scuffing / Scratches & Surface Wear

Restore an old photograph affected by dense surface scuffing. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

004. Silvering Along Dark Areas / Scratches & Surface Wear

Restore an old photograph affected by silvering along dark areas. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

005. Abrasion Across A Portrait / Scratches & Surface Wear

Restore an old photograph affected by abrasion across a portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

006. Tiny Emulsion Pinholes / Scratches & Surface Wear

Restore an old photograph affected by tiny emulsion pinholes. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

007. Single Straight Tear / Tears, Creases & Missing Corners

Restore an old photograph affected by single straight tear. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

008. Jagged Tear Through Background / Tears, Creases & Missing Corners

Restore an old photograph affected by jagged tear through background. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

009. Fold Across The Center / Tears, Creases & Missing Corners

Restore an old photograph affected by fold across the center. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

010. Cross-Shaped Folding Creases / Tears, Creases & Missing Corners

Restore an old photograph affected by cross-shaped folding creases. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

011. Torn Lower-Left Corner / Tears, Creases & Missing Corners

Restore an old photograph affected by torn lower-left corner. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

012. Torn Upper-Right Corner / Tears, Creases & Missing Corners

Restore an old photograph affected by torn upper-right corner. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

013. Overall Low Contrast / Fading & Exposure

Restore an old photograph affected by overall low contrast. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

014. Sun-Faded Highlights / Fading & Exposure

Restore an old photograph affected by sun-faded highlights. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

015. Washed-Out Midtones / Fading & Exposure

Restore an old photograph affected by washed-out midtones. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

016. Deep Shadows With Lost Separation / Fading & Exposure

Restore an old photograph affected by deep shadows with lost separation. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

017. Uneven Fading From Sunlight / Fading & Exposure

Restore an old photograph affected by uneven fading from sunlight. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

018. Underexposed Indoor Scene / Fading & Exposure

Restore an old photograph affected by underexposed indoor scene. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

019. Small Coffee-Colored Stain / Stains, Spots & Water Damage

Restore an old photograph affected by small coffee-colored stain. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

020. Water Ring In A Plain Corner / Stains, Spots & Water Damage

Restore an old photograph affected by water ring in a plain corner. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

021. Yellowed Paper Edges / Stains, Spots & Water Damage

Restore an old photograph affected by yellowed paper edges. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

022. Foxing Spots / Stains, Spots & Water Damage

Restore an old photograph affected by foxing spots. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

023. Scattered Dark Blotches / Stains, Spots & Water Damage

Restore an old photograph affected by scattered dark blotches. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

024. Old Adhesive Residue / Stains, Spots & Water Damage

Restore an old photograph affected by old adhesive residue. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

025. Formal Studio Headshot / Black & White Portraits

Restore an old photograph affected by formal studio headshot. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

026. Three-Quarter Portrait / Black & White Portraits

Restore an old photograph affected by three-quarter portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

027. Full-Length Standing Portrait / Black & White Portraits

Restore an old photograph affected by full-length standing portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

028. Seated Family Matriarch / Black & White Portraits

Restore an old photograph affected by seated family matriarch. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

029. Seated Family Patriarch / Black & White Portraits

Restore an old photograph affected by seated family patriarch. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

030. Two Siblings Portrait / Black & White Portraits

Restore an old photograph affected by two siblings portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

031. Early 1900S Cabinet Card / Historical & Family Archives

Restore an old photograph affected by early 1900s cabinet card. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

032. 1920S Family Snapshot / Historical & Family Archives

Restore an old photograph affected by 1920s family snapshot. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

033. 1930S Street Portrait / Historical & Family Archives

Restore an old photograph affected by 1930s street portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

034. 1940S Neighborhood Photograph / Historical & Family Archives

Restore an old photograph affected by 1940s neighborhood photograph. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

035. 1950S Family Living Room / Historical & Family Archives

Restore an old photograph affected by 1950s family living room. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

036. 1960S Backyard Gathering / Historical & Family Archives

Restore an old photograph affected by 1960s backyard gathering. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

037. Wedding Couple Formal Portrait / Wedding & Special Occasions

Restore an old photograph affected by wedding couple formal portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

038. Wedding Ceremony Photograph / Wedding & Special Occasions

Restore an old photograph affected by wedding ceremony photograph. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

039. Wedding Reception Group / Wedding & Special Occasions

Restore an old photograph affected by wedding reception group. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

040. Bride With Veil Portrait / Wedding & Special Occasions

Restore an old photograph affected by bride with veil portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

041. Groom With Boutonniere Portrait / Wedding & Special Occasions

Restore an old photograph affected by groom with boutonniere portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

042. Anniversary Photograph / Wedding & Special Occasions

Restore an old photograph affected by anniversary photograph. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

043. Formal Military Studio Portrait / Military & Uniform Portraits

Restore an old photograph affected by formal military studio portrait. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

044. Service Member In Dress Uniform / Military & Uniform Portraits

Restore an old photograph affected by service member in dress uniform. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

045. Military Family Photograph / Military & Uniform Portraits

Restore an old photograph affected by military family photograph. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

046. Group Of Service Members / Military & Uniform Portraits

Restore an old photograph affected by group of service members. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

047. Uniformed Portrait With Medals / Military & Uniform Portraits

Restore an old photograph affected by uniformed portrait with medals. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

048. Service Portrait With Insignia / Military & Uniform Portraits

Restore an old photograph affected by service portrait with insignia. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

049. Low-Resolution Flatbed Scan / Scanning & Image Quality

Restore an old photograph affected by low-resolution flatbed scan. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

050. Grainy 35Mm Print Scan / Scanning & Image Quality

Restore an old photograph affected by grainy 35mm print scan. Remove only visible physical defects and recover natural tonal separation, edges, and fine texture using reliable visual evidence from the photograph. Keep the original black-and-white, sepia, or color appearance rather than applying new color. Preserve realistic film grain and avoid plastic skin or artificial sharpening. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

PART TWO / BLACK & WHITE TO COLOR

051. Studio Portrait Of A Woman

Colorize the supplied original black-and-white photograph showing a studio portrait of a woman. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

052. Studio Portrait Of A Man

Colorize the supplied original black-and-white photograph showing a studio portrait of a man. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

053. Grandmother Seated In A Chair

Colorize the supplied original black-and-white photograph showing a grandmother seated in a chair. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

054. Grandfather In Formal Clothes

Colorize the supplied original black-and-white photograph showing a grandfather in formal clothes. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

055. Mother Holding A Baby

Colorize the supplied original black-and-white photograph showing a mother holding a baby. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

056. Father Holding A Child

Colorize the supplied original black-and-white photograph showing a father holding a child. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

057. Siblings Standing Together

Colorize the supplied original black-and-white photograph showing a siblings standing together. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

058. Three-Generation Family Portrait

Colorize the supplied original black-and-white photograph showing a three-generation family portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

059. Childhood School Photograph

Colorize the supplied original black-and-white photograph showing a childhood school photograph. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

060. Graduation Portrait

Colorize the supplied original black-and-white photograph showing a graduation portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

061. Engagement Portrait

Colorize the supplied original black-and-white photograph showing a engagement portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

062. Wedding Couple

Colorize the supplied original black-and-white photograph showing a wedding couple. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

063. Bride In A Lace Veil

Colorize the supplied original black-and-white photograph showing a bride in a lace veil. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

064. Groom In A Dark Suit

Colorize the supplied original black-and-white photograph showing a groom in a dark suit. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

065. Wedding Party Group

Colorize the supplied original black-and-white photograph showing a wedding party group. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

066. Anniversary Portrait

Colorize the supplied original black-and-white photograph showing a anniversary portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

067. Birthday Gathering

Colorize the supplied original black-and-white photograph showing a birthday gathering. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

068. Holiday Family Gathering

Colorize the supplied original black-and-white photograph showing a holiday family gathering. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

069. Family Picnic

Colorize the supplied original black-and-white photograph showing a family picnic. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

070. Child Playing In The Yard

Colorize the supplied original black-and-white photograph showing a child playing in the yard. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

071. 1920S City Street

Colorize the supplied original black-and-white photograph showing a 1920s city street. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

072. 1930S Storefront

Colorize the supplied original black-and-white photograph showing a 1930s storefront. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

073. 1940S Neighborhood

Colorize the supplied original black-and-white photograph showing a 1940s neighborhood. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

074. 1950S Living Room

Colorize the supplied original black-and-white photograph showing a 1950s living room. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

075. 1960S Family Kitchen

Colorize the supplied original black-and-white photograph showing a 1960s family kitchen. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

076. 1970S Vacation Snapshot

Colorize the supplied original black-and-white photograph showing a 1970s vacation snapshot. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

077. 1980S Family Gathering

Colorize the supplied original black-and-white photograph showing a 1980s family gathering. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

078. Vintage Farm Scene

Colorize the supplied original black-and-white photograph showing a vintage farm scene. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

079. Old Farmhouse Exterior

Colorize the supplied original black-and-white photograph showing a old farmhouse exterior. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

080. Historic Schoolhouse

Colorize the supplied original black-and-white photograph showing a historic schoolhouse. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

081. Small-Town Main Street

Colorize the supplied original black-and-white photograph showing a small-town main street. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

082. Railway Platform

Colorize the supplied original black-and-white photograph showing a railway platform. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

083. Vintage Automobile

Colorize the supplied original black-and-white photograph showing a vintage automobile. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

084. Classic Pickup Truck

Colorize the supplied original black-and-white photograph showing a classic pickup truck. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

085. Historic Bicycle

Colorize the supplied original black-and-white photograph showing a historic bicycle. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

086. Family Pet Portrait

Colorize the supplied original black-and-white photograph showing a family pet portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

087. Cat On A Porch

Colorize the supplied original black-and-white photograph showing a cat on a porch. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

088. Garden With Flowering Plants

Colorize the supplied original black-and-white photograph showing a garden with flowering plants. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

089. Mountain Landscape

Colorize the supplied original black-and-white photograph showing a mountain landscape. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

090. Beach Vacation

Colorize the supplied original black-and-white photograph showing a beach vacation. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

091. Woodland Path

Colorize the supplied original black-and-white photograph showing a woodland path. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

092. Formal Military Portrait

Colorize the supplied original black-and-white photograph showing a formal military portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

093. Naval Uniform Portrait

Colorize the supplied original black-and-white photograph showing a naval uniform portrait. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

094. Service Member With Family

Colorize the supplied original black-and-white photograph showing a service member with family. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

095. Military Group Photo

Colorize the supplied original black-and-white photograph showing a military group photo. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

096. Historic Factory Workers

Colorize the supplied original black-and-white photograph showing a historic factory workers. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Use period-sensitive color choices for clothing, materials, and surroundings without oversaturating the scene. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

097. Community Parade

Colorize the supplied original black-and-white photograph showing a community parade. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Keep skin tones nuanced, highlights neutral, and shadows realistic; avoid a modern HDR look. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

098. Old Church Exterior

Colorize the supplied original black-and-white photograph showing a old church exterior. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Colorize selectively with careful edges around hair, fabric, glass, and background objects. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

099. Ancestral Homestead

Colorize the supplied original black-and-white photograph showing a ancestral homestead. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Preserve photographic grain and gentle tonal depth; avoid making the photo look digitally illustrated. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.

100. Family Reunion Panorama

Colorize the supplied original black-and-white photograph showing a family reunion panorama. Create a restrained, photorealistic color interpretation, using plausible colors consistent with the visible materials, lighting, and historical era. Choose subdued, era-appropriate fabric colors and believable skin tones; preserve natural light and shadow. Do not assert uncertain colors as historically accurate. Use the uploaded photograph as the sole source. Preserve the exact identities, facial features, expressions, age, pose, clothing, composition, and original objects. Do not add or remove people, invent details, alter readable text or insignia, or modernize the scene. If evidence is missing, avoid confident reconstruction.
