DESIGN SYSTEM

01 TYPOGRAPHY FIRST

Use exact slogan text with clear hierarchy and generous spacing.

02 FLAT COLOR

Prefer crisp silhouettes and a limited palette over heavy effects.

03 STRONG COMPOSITION

Keep the central mascot and headline readable at shirt scale.

04 CLEAN EXPORT

Vector-style images are not automatically editable SVG files.

05 VERIFY BEFORE SELLING

Proofread generated text and check originality and trademarks.

026 | PUMPKIN SPICE AND QUESTIONABLE ADVICE

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “PUMPKIN SPICE AND QUESTIONABLE ADVICE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a sleepy pumpkin with an exaggerated expression and distinctive personality. Add a secondary fall leaves and a few restrained steaming mug details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

027 | FALLING APART, BUT MAKE IT COZY

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “FALLING APART, BUT MAKE IT COZY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a fall leaves with an exaggerated expression and distinctive personality. Add a secondary steaming mug and a few restrained acorns details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

028 | LEAVES ARE FALLING, SO ARE MY STANDARDS

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “LEAVES ARE FALLING, SO ARE MY STANDARDS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a steaming mug with an exaggerated expression and distinctive personality. Add a secondary acorns and a few restrained sleepy pumpkin details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

029 | CIDER FIRST, RESPONSIBILITIES LATER

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “CIDER FIRST, RESPONSIBILITIES LATER”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a acorns with an exaggerated expression and distinctive personality. Add a secondary sleepy pumpkin and a few restrained fall leaves details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

030 | MY CARDIGAN HAS TRUST ISSUES

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “MY CARDIGAN HAS TRUST ISSUES”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a sleepy pumpkin with an exaggerated expression and distinctive personality. Add a secondary fall leaves and a few restrained steaming mug details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

031 | AUTUMN IS MY PERSONALITY NOW

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “AUTUMN IS MY PERSONALITY NOW”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a fall leaves with an exaggerated expression and distinctive personality. Add a secondary steaming mug and a few restrained acorns details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

032 | COZY WITH A SIDE OF CHAOS

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “COZY WITH A SIDE OF CHAOS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a steaming mug with an exaggerated expression and distinctive personality. Add a secondary acorns and a few restrained sleepy pumpkin details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

033 | I RUN ON SOUP AND DENIAL

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “I RUN ON SOUP AND DENIAL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a acorns with an exaggerated expression and distinctive personality. Add a secondary sleepy pumpkin and a few restrained fall leaves details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

034 | FLANNEL IS MY FORMALWEAR

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “FLANNEL IS MY FORMALWEAR”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a sleepy pumpkin with an exaggerated expression and distinctive personality. Add a secondary fall leaves and a few restrained steaming mug details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

035 | GOURD VIBES ONLY

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “GOURD VIBES ONLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a fall leaves with an exaggerated expression and distinctive personality. Add a secondary steaming mug and a few restrained acorns details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

036 | PUMPKIN SPICE AND QUESTIONABLE ADVICE

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “PUMPKIN SPICE AND QUESTIONABLE ADVICE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a steaming mug with an exaggerated expression and distinctive personality. Add a secondary acorns and a few restrained sleepy pumpkin details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

037 | FALLING APART, BUT MAKE IT COZY

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “FALLING APART, BUT MAKE IT COZY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a acorns with an exaggerated expression and distinctive personality. Add a secondary sleepy pumpkin and a few restrained fall leaves details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

038 | LEAVES ARE FALLING, SO ARE MY STANDARDS

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “LEAVES ARE FALLING, SO ARE MY STANDARDS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a sleepy pumpkin with an exaggerated expression and distinctive personality. Add a secondary fall leaves and a few restrained steaming mug details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

039 | CIDER FIRST, RESPONSIBILITIES LATER

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “CIDER FIRST, RESPONSIBILITIES LATER”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a fall leaves with an exaggerated expression and distinctive personality. Add a secondary steaming mug and a few restrained acorns details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

040 | MY CARDIGAN HAS TRUST ISSUES

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “MY CARDIGAN HAS TRUST ISSUES”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a steaming mug with an exaggerated expression and distinctive personality. Add a secondary acorns and a few restrained sleepy pumpkin details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

041 | AUTUMN IS MY PERSONALITY NOW

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “AUTUMN IS MY PERSONALITY NOW”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a acorns with an exaggerated expression and distinctive personality. Add a secondary sleepy pumpkin and a few restrained fall leaves details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

042 | COZY WITH A SIDE OF CHAOS

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “COZY WITH A SIDE OF CHAOS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a sleepy pumpkin with an exaggerated expression and distinctive personality. Add a secondary fall leaves and a few restrained steaming mug details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

043 | I RUN ON SOUP AND DENIAL

Create a premium, original, print-focused vector-style graphic for the Fall & Pumpkin Spice collection. The ONLY readable words in the finished artwork must be exactly: “I RUN ON SOUP AND DENIAL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a fall leaves with an exaggerated expression and distinctive personality. Add a secondary steaming mug and a few restrained acorns details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

051 | PASS THE GRAVY, NOT THE OPINIONS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “PASS THE GRAVY, NOT THE OPINIONS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

052 | THANKFUL FOR STRETCHY PANTS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “THANKFUL FOR STRETCHY PANTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

053 | TURKEY, TATERS, TOTAL CHAOS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “TURKEY, TATERS, TOTAL CHAOS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

054 | I CAME FOR THE ROLLS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “I CAME FOR THE ROLLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

055 | FAMILY DRAMA IS NOT A SIDE DISH

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “FAMILY DRAMA IS NOT A SIDE DISH”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

056 | STUFFED WITH ZERO REGRETS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “STUFFED WITH ZERO REGRETS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

057 | LEFTOVERS ARE MY LOVE LANGUAGE

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “LEFTOVERS ARE MY LOVE LANGUAGE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

058 | GRAVY IS MY COPING SKILL

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “GRAVY IS MY COPING SKILL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

059 | LET’S TALK ABOUT PIE INSTEAD

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “LET’S TALK ABOUT PIE INSTEAD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

060 | THANKFUL I CAN LEAVE EARLY

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “THANKFUL I CAN LEAVE EARLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

061 | PASS THE GRAVY, NOT THE OPINIONS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “PASS THE GRAVY, NOT THE OPINIONS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

062 | THANKFUL FOR STRETCHY PANTS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “THANKFUL FOR STRETCHY PANTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

064 | I CAME FOR THE ROLLS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “I CAME FOR THE ROLLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

065 | FAMILY DRAMA IS NOT A SIDE DISH

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “FAMILY DRAMA IS NOT A SIDE DISH”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

066 | STUFFED WITH ZERO REGRETS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “STUFFED WITH ZERO REGRETS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

067 | LEFTOVERS ARE MY LOVE LANGUAGE

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “LEFTOVERS ARE MY LOVE LANGUAGE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

068 | GRAVY IS MY COPING SKILL

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “GRAVY IS MY COPING SKILL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

069 | LET’S TALK ABOUT PIE INSTEAD

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “LET’S TALK ABOUT PIE INSTEAD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

070 | THANKFUL I CAN LEAVE EARLY

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “THANKFUL I CAN LEAVE EARLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

071 | PASS THE GRAVY, NOT THE OPINIONS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “PASS THE GRAVY, NOT THE OPINIONS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

072 | THANKFUL FOR STRETCHY PANTS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “THANKFUL FOR STRETCHY PANTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a pie slice with an exaggerated expression and distinctive personality. Add a secondary gravy boat and a few restrained fork details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

073 | TURKEY, TATERS, TOTAL CHAOS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “TURKEY, TATERS, TOTAL CHAOS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a gravy boat with an exaggerated expression and distinctive personality. Add a secondary fork and a few restrained smug turkey details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

074 | I CAME FOR THE ROLLS

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “I CAME FOR THE ROLLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a fork with an exaggerated expression and distinctive personality. Add a secondary smug turkey and a few restrained pie slice details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

075 | FAMILY DRAMA IS NOT A SIDE DISH

Create a premium, original, print-focused vector-style graphic for the Thanksgiving Unfiltered collection. The ONLY readable words in the finished artwork must be exactly: “FAMILY DRAMA IS NOT A SIDE DISH”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a smug turkey with an exaggerated expression and distinctive personality. Add a secondary pie slice and a few restrained gravy boat details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. CHRISTMAS CHAOS

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

076 | SANTA, DEFINE GOOD

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SANTA, DEFINE GOOD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

077 | SLEIGHING IT? ABSOLUTELY NOT

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGHING IT? ABSOLUTELY NOT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

078 | MERRY EVERYTHING, I NEED A NAP

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “MERRY EVERYTHING, I NEED A NAP”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

079 | JINGLE BELLS, MY BUDGET YELLS

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “JINGLE BELLS, MY BUDGET YELLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

080 | THE TREE IS UP, MY PATIENCE IS DOWN

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE IS UP, MY PATIENCE IS DOWN”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

081 | DECK THE HALLS, NOT MY SCHEDULE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “DECK THE HALLS, NOT MY SCHEDULE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

082 | I’M THE REASON SANTA NEEDS COFFEE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “I’M THE REASON SANTA NEEDS COFFEE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

083 | HO HO HOLD MY COCOA

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “HO HO HOLD MY COCOA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

084 | WRAPPED IN CHAOS AND TAPE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “WRAPPED IN CHAOS AND TAPE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

089 | JINGLE BELLS, MY BUDGET YELLS

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “JINGLE BELLS, MY BUDGET YELLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

090 | THE TREE IS UP, MY PATIENCE IS DOWN

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE IS UP, MY PATIENCE IS DOWN”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

091 | DECK THE HALLS, NOT MY SCHEDULE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “DECK THE HALLS, NOT MY SCHEDULE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

092 | I’M THE REASON SANTA NEEDS COFFEE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “I’M THE REASON SANTA NEEDS COFFEE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

093 | HO HO HOLD MY COCOA

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “HO HO HOLD MY COCOA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

094 | WRAPPED IN CHAOS AND TAPE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “WRAPPED IN CHAOS AND TAPE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

095 | CHRISTMAS SPIRIT: LOW BATTERY

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “CHRISTMAS SPIRIT: LOW BATTERY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

096 | SANTA, DEFINE GOOD

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SANTA, DEFINE GOOD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

097 | SLEIGHING IT? ABSOLUTELY NOT

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGHING IT? ABSOLUTELY NOT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

103 | HO HO HOLD MY COCOA

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “HO HO HOLD MY COCOA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

104 | WRAPPED IN CHAOS AND TAPE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “WRAPPED IN CHAOS AND TAPE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

105 | CHRISTMAS SPIRIT: LOW BATTERY

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “CHRISTMAS SPIRIT: LOW BATTERY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

106 | SANTA, DEFINE GOOD

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SANTA, DEFINE GOOD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

107 | SLEIGHING IT? ABSOLUTELY NOT

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGHING IT? ABSOLUTELY NOT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

108 | MERRY EVERYTHING, I NEED A NAP

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “MERRY EVERYTHING, I NEED A NAP”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

109 | JINGLE BELLS, MY BUDGET YELLS

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “JINGLE BELLS, MY BUDGET YELLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

110 | THE TREE IS UP, MY PATIENCE IS DOWN

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE IS UP, MY PATIENCE IS DOWN”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

111 | DECK THE HALLS, NOT MY SCHEDULE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “DECK THE HALLS, NOT MY SCHEDULE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

112 | I’M THE REASON SANTA NEEDS COFFEE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “I’M THE REASON SANTA NEEDS COFFEE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

113 | HO HO HOLD MY COCOA

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “HO HO HOLD MY COCOA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

114 | WRAPPED IN CHAOS AND TAPE

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “WRAPPED IN CHAOS AND TAPE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

115 | CHRISTMAS SPIRIT: LOW BATTERY

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “CHRISTMAS SPIRIT: LOW BATTERY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

116 | SANTA, DEFINE GOOD

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SANTA, DEFINE GOOD”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

117 | SLEIGHING IT? ABSOLUTELY NOT

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGHING IT? ABSOLUTELY NOT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a tangled lights with an exaggerated expression and distinctive personality. Add a secondary gift boxes and a few restrained holly details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

118 | MERRY EVERYTHING, I NEED A NAP

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “MERRY EVERYTHING, I NEED A NAP”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a gift boxes with an exaggerated expression and distinctive personality. Add a secondary holly and a few restrained overworked Santa details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

119 | JINGLE BELLS, MY BUDGET YELLS

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “JINGLE BELLS, MY BUDGET YELLS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a holly with an exaggerated expression and distinctive personality. Add a secondary overworked Santa and a few restrained tangled lights details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

120 | THE TREE IS UP, MY PATIENCE IS DOWN

Create a premium, original, print-focused vector-style graphic for the Christmas Chaos collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE IS UP, MY PATIENCE IS DOWN”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a overworked Santa with an exaggerated expression and distinctive personality. Add a secondary tangled lights and a few restrained gift boxes details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. UGLY CHRISTMAS SHIRT CLUB

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

121 | THIS IS MY UGLY CHRISTMAS SHIRT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS IS MY UGLY CHRISTMAS SHIRT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

122 | I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

123 | UGLY BY DESIGN, FESTIVE BY ACCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “UGLY BY DESIGN, FESTIVE BY ACCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

124 | I WAS PROMISED A SWEATER TROPHY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I WAS PROMISED A SWEATER TROPHY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

125 | THIS OUTFIT IS A HOLIDAY INCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS OUTFIT IS A HOLIDAY INCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

126 | FESTIVELY QUESTIONABLE

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “FESTIVELY QUESTIONABLE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

127 | TOO GLAM TO GIVE A DAMN, SANTA

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “TOO GLAM TO GIVE A DAMN, SANTA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

129 | MERRY CRINGEMAS

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “MERRY CRINGEMAS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

130 | DRESSED LIKE A GIFT RECEIPT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “DRESSED LIKE A GIFT RECEIPT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

131 | THIS IS MY UGLY CHRISTMAS SHIRT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS IS MY UGLY CHRISTMAS SHIRT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

132 | I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

133 | UGLY BY DESIGN, FESTIVE BY ACCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “UGLY BY DESIGN, FESTIVE BY ACCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

134 | I WAS PROMISED A SWEATER TROPHY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I WAS PROMISED A SWEATER TROPHY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

135 | THIS OUTFIT IS A HOLIDAY INCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS OUTFIT IS A HOLIDAY INCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

136 | FESTIVELY QUESTIONABLE

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “FESTIVELY QUESTIONABLE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

137 | TOO GLAM TO GIVE A DAMN, SANTA

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “TOO GLAM TO GIVE A DAMN, SANTA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

138 | KNIT HAPPENS, EVEN ON T-SHIRTS

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “KNIT HAPPENS, EVEN ON T-SHIRTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

139 | MERRY CRINGEMAS

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “MERRY CRINGEMAS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

140 | DRESSED LIKE A GIFT RECEIPT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “DRESSED LIKE A GIFT RECEIPT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

141 | THIS IS MY UGLY CHRISTMAS SHIRT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS IS MY UGLY CHRISTMAS SHIRT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

142 | I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

143 | UGLY BY DESIGN, FESTIVE BY ACCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “UGLY BY DESIGN, FESTIVE BY ACCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

144 | I WAS PROMISED A SWEATER TROPHY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I WAS PROMISED A SWEATER TROPHY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

145 | THIS OUTFIT IS A HOLIDAY INCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS OUTFIT IS A HOLIDAY INCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

146 | FESTIVELY QUESTIONABLE

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “FESTIVELY QUESTIONABLE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

147 | TOO GLAM TO GIVE A DAMN, SANTA

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “TOO GLAM TO GIVE A DAMN, SANTA”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

148 | KNIT HAPPENS, EVEN ON T-SHIRTS

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “KNIT HAPPENS, EVEN ON T-SHIRTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

149 | MERRY CRINGEMAS

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “MERRY CRINGEMAS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

150 | DRESSED LIKE A GIFT RECEIPT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “DRESSED LIKE A GIFT RECEIPT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

151 | THIS IS MY UGLY CHRISTMAS SHIRT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS IS MY UGLY CHRISTMAS SHIRT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

152 | I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I UNDERSTOOD THE ASSIGNMENT TOO LITERALLY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a tiny bells with an exaggerated expression and distinctive personality. Add a secondary awkward snowman and a few restrained knit zigzags details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

153 | UGLY BY DESIGN, FESTIVE BY ACCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “UGLY BY DESIGN, FESTIVE BY ACCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a awkward snowman with an exaggerated expression and distinctive personality. Add a secondary knit zigzags and a few restrained baubles details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

154 | I WAS PROMISED A SWEATER TROPHY

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “I WAS PROMISED A SWEATER TROPHY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a knit zigzags with an exaggerated expression and distinctive personality. Add a secondary baubles and a few restrained tiny bells details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

155 | THIS OUTFIT IS A HOLIDAY INCIDENT

Create a premium, original, print-focused vector-style graphic for the Ugly Christmas Shirt Club collection. The ONLY readable words in the finished artwork must be exactly: “THIS OUTFIT IS A HOLIDAY INCIDENT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a baubles with an exaggerated expression and distinctive personality. Add a secondary tiny bells and a few restrained awkward snowman details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. REINDEER & NORTH POLE DRAMA

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

156 | NORTH POLE HUMAN RESOURCES IS CLOSED

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “NORTH POLE HUMAN RESOURCES IS CLOSED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a sarcastic reindeer with an exaggerated expression and distinctive personality. Add a secondary elf clipboard and a few restrained snowflakes details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

157 | RUDOLPH HAS MUTED THE GROUP CHAT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “RUDOLPH HAS MUTED THE GROUP CHAT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a elf clipboard with an exaggerated expression and distinctive personality. Add a secondary snowflakes and a few restrained candy cane details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

158 | SANTA’S INTERN, UNPAID AND TIRED

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “SANTA’S INTERN, UNPAID AND TIRED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a snowflakes with an exaggerated expression and distinctive personality. Add a secondary candy cane and a few restrained sarcastic reindeer details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

159 | REINDEER GAMES? I QUIT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “REINDEER GAMES? I QUIT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a candy cane with an exaggerated expression and distinctive personality. Add a secondary sarcastic reindeer and a few restrained elf clipboard details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

160 | ELF MANAGEMENT HAS CONCERNS

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “ELF MANAGEMENT HAS CONCERNS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a sarcastic reindeer with an exaggerated expression and distinctive personality. Add a secondary elf clipboard and a few restrained snowflakes details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

162 | SLEIGH TEAM ON STRIKE

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGH TEAM ON STRIKE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a snowflakes with an exaggerated expression and distinctive personality. Add a secondary candy cane and a few restrained sarcastic reindeer details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

163 | CHIEF COOKIE INSPECTOR

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “CHIEF COOKIE INSPECTOR”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a candy cane with an exaggerated expression and distinctive personality. Add a secondary sarcastic reindeer and a few restrained elf clipboard details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

164 | NORTH POLE NIGHT SHIFT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “NORTH POLE NIGHT SHIFT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a sarcastic reindeer with an exaggerated expression and distinctive personality. Add a secondary elf clipboard and a few restrained snowflakes details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

165 | HOOVES OFF MY SNACKS

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “HOOVES OFF MY SNACKS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a elf clipboard with an exaggerated expression and distinctive personality. Add a secondary snowflakes and a few restrained candy cane details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

166 | NORTH POLE HUMAN RESOURCES IS CLOSED

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “NORTH POLE HUMAN RESOURCES IS CLOSED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a snowflakes with an exaggerated expression and distinctive personality. Add a secondary candy cane and a few restrained sarcastic reindeer details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

167 | RUDOLPH HAS MUTED THE GROUP CHAT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “RUDOLPH HAS MUTED THE GROUP CHAT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a candy cane with an exaggerated expression and distinctive personality. Add a secondary sarcastic reindeer and a few restrained elf clipboard details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

168 | SANTA’S INTERN, UNPAID AND TIRED

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “SANTA’S INTERN, UNPAID AND TIRED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a sarcastic reindeer with an exaggerated expression and distinctive personality. Add a secondary elf clipboard and a few restrained snowflakes details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

169 | REINDEER GAMES? I QUIT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “REINDEER GAMES? I QUIT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a elf clipboard with an exaggerated expression and distinctive personality. Add a secondary snowflakes and a few restrained candy cane details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

170 | ELF MANAGEMENT HAS CONCERNS

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “ELF MANAGEMENT HAS CONCERNS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a snowflakes with an exaggerated expression and distinctive personality. Add a secondary candy cane and a few restrained sarcastic reindeer details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

171 | NICE LIST PENDING REVIEW

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “NICE LIST PENDING REVIEW”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a candy cane with an exaggerated expression and distinctive personality. Add a secondary sarcastic reindeer and a few restrained elf clipboard details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

172 | SLEIGH TEAM ON STRIKE

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “SLEIGH TEAM ON STRIKE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a sarcastic reindeer with an exaggerated expression and distinctive personality. Add a secondary elf clipboard and a few restrained snowflakes details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

173 | CHIEF COOKIE INSPECTOR

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “CHIEF COOKIE INSPECTOR”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a elf clipboard with an exaggerated expression and distinctive personality. Add a secondary snowflakes and a few restrained candy cane details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

174 | NORTH POLE NIGHT SHIFT

Create a premium, original, print-focused vector-style graphic for the Reindeer & North Pole Drama collection. The ONLY readable words in the finished artwork must be exactly: “NORTH POLE NIGHT SHIFT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a snowflakes with an exaggerated expression and distinctive personality. Add a secondary candy cane and a few restrained sarcastic reindeer details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

178 | WINTER MADE ME DO IT

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “WINTER MADE ME DO IT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a snowdrifts with an exaggerated expression and distinctive personality. Add a secondary scarf and a few restrained shivering coffee cup details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

179 | HOT COCOA, COLD ATTITUDE

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “HOT COCOA, COLD ATTITUDE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a scarf with an exaggerated expression and distinctive personality. Add a secondary shivering coffee cup and a few restrained mittens details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

180 | HIBERNATION IS A LIFE GOAL

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “HIBERNATION IS A LIFE GOAL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a shivering coffee cup with an exaggerated expression and distinctive personality. Add a secondary mittens and a few restrained snowdrifts details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

181 | SNOW THANK YOU

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “SNOW THANK YOU”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a mittens with an exaggerated expression and distinctive personality. Add a secondary snowdrifts and a few restrained scarf details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

182 | FROSTBITE AND BAD DECISIONS

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FROSTBITE AND BAD DECISIONS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a snowdrifts with an exaggerated expression and distinctive personality. Add a secondary scarf and a few restrained shivering coffee cup details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

183 | FLAKES OUTSIDE, FLAKES IN MY INBOX

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FLAKES OUTSIDE, FLAKES IN MY INBOX”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a scarf with an exaggerated expression and distinctive personality. Add a secondary shivering coffee cup and a few restrained mittens details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

184 | MY BLANKET IS THE BOSS

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “MY BLANKET IS THE BOSS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a shivering coffee cup with an exaggerated expression and distinctive personality. Add a secondary mittens and a few restrained snowdrifts details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

185 | FREEZING WITH PURPOSE

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FREEZING WITH PURPOSE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a mittens with an exaggerated expression and distinctive personality. Add a secondary snowdrifts and a few restrained scarf details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

186 | CURRENTLY DEFROSTING MY PERSONALITY

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “CURRENTLY DEFROSTING MY PERSONALITY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a snowdrifts with an exaggerated expression and distinctive personality. Add a secondary scarf and a few restrained shivering coffee cup details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

187 | TOO COLD TO BE POLITE

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “TOO COLD TO BE POLITE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a scarf with an exaggerated expression and distinctive personality. Add a secondary shivering coffee cup and a few restrained mittens details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

188 | WINTER MADE ME DO IT

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “WINTER MADE ME DO IT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a shivering coffee cup with an exaggerated expression and distinctive personality. Add a secondary mittens and a few restrained snowdrifts details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

189 | HOT COCOA, COLD ATTITUDE

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “HOT COCOA, COLD ATTITUDE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a mittens with an exaggerated expression and distinctive personality. Add a secondary snowdrifts and a few restrained scarf details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

190 | HIBERNATION IS A LIFE GOAL

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “HIBERNATION IS A LIFE GOAL”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a snowdrifts with an exaggerated expression and distinctive personality. Add a secondary scarf and a few restrained shivering coffee cup details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

191 | SNOW THANK YOU

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “SNOW THANK YOU”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a scarf with an exaggerated expression and distinctive personality. Add a secondary shivering coffee cup and a few restrained mittens details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

192 | FROSTBITE AND BAD DECISIONS

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FROSTBITE AND BAD DECISIONS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a shivering coffee cup with an exaggerated expression and distinctive personality. Add a secondary mittens and a few restrained snowdrifts details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

193 | FLAKES OUTSIDE, FLAKES IN MY INBOX

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FLAKES OUTSIDE, FLAKES IN MY INBOX”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a mittens with an exaggerated expression and distinctive personality. Add a secondary snowdrifts and a few restrained scarf details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

194 | MY BLANKET IS THE BOSS

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “MY BLANKET IS THE BOSS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a snowdrifts with an exaggerated expression and distinctive personality. Add a secondary scarf and a few restrained shivering coffee cup details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

195 | FREEZING WITH PURPOSE

Create a premium, original, print-focused vector-style graphic for the Winter Survival Mode collection. The ONLY readable words in the finished artwork must be exactly: “FREEZING WITH PURPOSE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a scarf with an exaggerated expression and distinctive personality. Add a secondary shivering coffee cup and a few restrained mittens details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. NEW YEAR’S BAD DECISIONS

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

196 | NEW YEAR, SAME PASSWORD

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "NEW YEAR, SAME PASSWORD". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a disco clock with an exaggerated expression and distinctive personality. Add a secondary confetti and a few restrained party hat details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

197 | RESOLUTIONS UNDER CONSTRUCTION

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "RESOLUTIONS UNDER CONSTRUCTION". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a confetti with an exaggerated expression and distinctive personality. Add a secondary party hat and a few restrained calendar details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

198 | MIDNIGHT IS PAST MY BEDTIME

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "MIDNIGHT IS PAST MY BEDTIME". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a party hat with an exaggerated expression and distinctive personality. Add a secondary calendar and a few restrained disco clock details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

199 | 2027: PLEASE BE NORMAL

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "2027: PLEASE BE NORMAL". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a calendar with an exaggerated expression and distinctive personality. Add a secondary disco clock and a few restrained confetti details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

200 | MY GOALS NEED A NAP

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "MY GOALS NEED A NAP". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a disco clock with an exaggerated expression and distinctive personality. Add a secondary confetti and a few restrained party hat details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

201 | CONFETTI NOW, CONSEQUENCES LATER

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "CONFETTI NOW, CONSEQUENCES LATER". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a confetti with an exaggerated expression and distinctive personality. Add a secondary party hat and a few restrained calendar details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

202 | NEW YEAR, OLD CHAOS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "NEW YEAR, OLD CHAOS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a party hat with an exaggerated expression and distinctive personality. Add a secondary calendar and a few restrained disco clock details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

203 | I RESOLVE TO LOWER EXPECTATIONS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "I RESOLVE TO LOWER EXPECTATIONS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a calendar with an exaggerated expression and distinctive personality. Add a secondary disco clock and a few restrained confetti details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

204 | COUNTDOWN TO MY NEXT SNACK

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "COUNTDOWN TO MY NEXT SNACK". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a disco clock with an exaggerated expression and distinctive personality. Add a secondary confetti and a few restrained party hat details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

205 | FRESH CALENDAR, SAME MESS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "FRESH CALENDAR, SAME MESS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a confetti with an exaggerated expression and distinctive personality. Add a secondary party hat and a few restrained calendar details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

206 | NEW YEAR, SAME PASSWORD

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "NEW YEAR, SAME PASSWORD". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a party hat with an exaggerated expression and distinctive personality. Add a secondary calendar and a few restrained disco clock details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

207 | RESOLUTIONS UNDER CONSTRUCTION

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "RESOLUTIONS UNDER CONSTRUCTION". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a calendar with an exaggerated expression and distinctive personality. Add a secondary disco clock and a few restrained confetti details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

208 | MIDNIGHT IS PAST MY BEDTIME

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "MIDNIGHT IS PAST MY BEDTIME". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a disco clock with an exaggerated expression and distinctive personality. Add a secondary confetti and a few restrained party hat details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

209 | 2027: PLEASE BE NORMAL

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "2027: PLEASE BE NORMAL". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a confetti with an exaggerated expression and distinctive personality. Add a secondary party hat and a few restrained calendar details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

210 | MY GOALS NEED A NAP

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "MY GOALS NEED A NAP". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a party hat with an exaggerated expression and distinctive personality. Add a secondary calendar and a few restrained disco clock details only where they strengthen the joke. Use 1970s groovy bubble typography with exaggerated swashes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

211 | CONFETTI NOW, CONSEQUENCES LATER

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "CONFETTI NOW, CONSEQUENCES LATER". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a calendar with an exaggerated expression and distinctive personality. Add a secondary disco clock and a few restrained confetti details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

212 | NEW YEAR, OLD CHAOS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "NEW YEAR, OLD CHAOS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a disco clock with an exaggerated expression and distinctive personality. Add a secondary confetti and a few restrained party hat details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

213 | I RESOLVE TO LOWER EXPECTATIONS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "I RESOLVE TO LOWER EXPECTATIONS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a confetti with an exaggerated expression and distinctive personality. Add a secondary party hat and a few restrained calendar details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

214 | COUNTDOWN TO MY NEXT SNACK

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "COUNTDOWN TO MY NEXT SNACK". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a party hat with an exaggerated expression and distinctive personality. Add a secondary calendar and a few restrained disco clock details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

215 | FRESH CALENDAR, SAME MESS

Create a premium, original, print-focused vector-style graphic for the New Year's Bad Decisions collection. The ONLY readable words in the finished artwork must be exactly: "FRESH CALENDAR, SAME MESS". Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a calendar with an exaggerated expression and distinctive personality. Add a secondary disco clock and a few restrained confetti details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. HOLIDAY PET SHENANIGANS

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

216 | THE CAT IS THE CHRISTMAS TREE TOPPER

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “THE CAT IS THE CHRISTMAS TREE TOPPER”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a mischievous cat or dog with an exaggerated expression and distinctive personality. Add a secondary ornament and a few restrained paw prints details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

217 | SANTA PAWS SAW EVERYTHING

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “SANTA PAWS SAW EVERYTHING”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a ornament with an exaggerated expression and distinctive personality. Add a secondary paw prints and a few restrained ribbon details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

218 | NAUGHTY LIST, GOOD DOG ENERGY

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “NAUGHTY LIST, GOOD DOG ENERGY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a paw prints with an exaggerated expression and distinctive personality. Add a secondary ribbon and a few restrained mischievous cat or dog details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

219 | FUR EVERYWHERE, JOY EVERYWHERE

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “FUR EVERYWHERE, JOY EVERYWHERE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a ribbon with an exaggerated expression and distinctive personality. Add a secondary mischievous cat or dog and a few restrained ornament details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

220 | I ATE THE GIFT TAG

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “I ATE THE GIFT TAG”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a mischievous cat or dog with an exaggerated expression and distinctive personality. Add a secondary ornament and a few restrained paw prints details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

221 | THE TREE STARTED IT

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE STARTED IT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a ornament with an exaggerated expression and distinctive personality. Add a secondary paw prints and a few restrained ribbon details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

223 | MEOWY AND BRIGHT

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “MEOWY AND BRIGHT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a ribbon with an exaggerated expression and distinctive personality. Add a secondary mischievous cat or dog and a few restrained ornament details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

224 | PAWS OFF THE COOKIES

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “PAWS OFF THE COOKIES”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a mischievous cat or dog with an exaggerated expression and distinctive personality. Add a secondary ornament and a few restrained paw prints details only where they strengthen the joke. Use vintage hand-painted roadside diner signage with chunky shadow lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

230 | I ATE THE GIFT TAG

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “I ATE THE GIFT TAG”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a paw prints with an exaggerated expression and distinctive personality. Add a secondary ribbon and a few restrained mischievous cat or dog details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

231 | THE TREE STARTED IT

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “THE TREE STARTED IT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a ribbon with an exaggerated expression and distinctive personality. Add a secondary mischievous cat or dog and a few restrained ornament details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. 232 | HOLIDAY ZOOMIES ACTIVATED

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “HOLIDAY ZOOMIES ACTIVATED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a mischievous cat or dog with an exaggerated expression and distinctive personality. Add a secondary ornament and a few restrained paw prints details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

233 | MEOWY AND BRIGHT

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “MEOWY AND BRIGHT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a ornament with an exaggerated expression and distinctive personality. Add a secondary paw prints and a few restrained ribbon details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. 234 | PAWS OFF THE COOKIES

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “PAWS OFF THE COOKIES”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a paw prints with an exaggerated expression and distinctive personality. Add a secondary ribbon and a few restrained mischievous cat or dog details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

235 | FELIZ NAVIDOG

Create a premium, original, print-focused vector-style graphic for the Holiday Pet Shenanigans collection. The ONLY readable words in the finished artwork must be exactly: “FELIZ NAVIDOG”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a ribbon with an exaggerated expression and distinctive personality. Add a secondary mischievous cat or dog and a few restrained ornament details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart. DARK HUMOR HOLIDAY EDITION

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

236 | DEAD INSIDE, FESTIVE OUTSIDE

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “DEAD INSIDE, FESTIVE OUTSIDE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a cheerful skeleton with an exaggerated expression and distinctive personality. Add a secondary black holly and a few restrained crescent moon details only where they strengthen the joke. Use bold western rodeo poster with slab-serif typography, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

237 | SKELETON CREW CHRISTMAS PARTY

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “SKELETON CREW CHRISTMAS PARTY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a black holly with an exaggerated expression and distinctive personality. Add a secondary crescent moon and a few restrained candle details only where they strengthen the joke. Use minimal two-color pictogram design with oversized kinetic lettering, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cocoa brown, dusty rose, muted gold, and cream; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

238 | BONE TO BE MERRY

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “BONE TO BE MERRY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a crescent moon with an exaggerated expression and distinctive personality. Add a secondary candle and a few restrained cheerful skeleton details only where they strengthen the joke. Use cartoon rubber-hose character design with expressive gloves and shoes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

239 | MERRY CRYPTMAS

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “MERRY CRYPTMAS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a candle with an exaggerated expression and distinctive personality. Add a secondary cheerful skeleton and a few restrained black holly details only where they strengthen the joke. Use 1960s souvenir-shop screen print with mid-century character shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

240 | I HAVE A SKELETON IN MY STOCKING

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “I HAVE A SKELETON IN MY STOCKING”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a cheerful skeleton with an exaggerated expression and distinctive personality. Add a secondary black holly and a few restrained crescent moon details only where they strengthen the joke. Use bold 1990s comic-book sticker with explosive speech-bubble geometry, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

242 | SANTA KNOWS WHERE THE BODIES ARE BURIED

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “SANTA KNOWS WHERE THE BODIES ARE BURIED”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a crescent moon with an exaggerated expression and distinctive personality. Add a secondary candle and a few restrained cheerful skeleton details only where they strengthen the joke. Use playful retro collegiate badge with mascot illustration, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

243 | HOLIDAY SPIRIT, GRAVEYARD SHIFT

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “HOLIDAY SPIRIT, GRAVEYARD SHIFT”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a candle with an exaggerated expression and distinctive personality. Add a secondary cheerful skeleton and a few restrained black holly details only where they strengthen the joke. Use modern kawaii mascot sticker with thick rounded outlines, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. 245 | BLACK COFFEE, BLACK ORNAMENTS

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “BLACK COFFEE, BLACK ORNAMENTS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a black holly with an exaggerated expression and distinctive personality. Add a secondary crescent moon and a few restrained candle details only where they strengthen the joke. Use woodcut-inspired folk art with simplified engraved strokes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: icy teal, cherry red, ink navy, and off-white; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. Every mascot feature, decoration, and letter should have a continuous clean silhouette suitable for tracing into editable SVG paths. Use a maximum of 5–6 distinct opaque spot colors; retain clear interior counters in lettering, no tiny isolated specks, no hairline gaps, and no semi-transparent pixels within the design. NO gradients, soft shadows, glow, lighting effects, blur, grain, photographic textures, distressed noise, painterly strokes, bevels, raster effects, or 3D rendering. Keep shapes distinct and easily separated into color layers.

TRANSPARENCY, OUTPUT & VECTOR CONVERSION

OUTPUT LOCK — ONE centered isolated graphic only, with generous safe margins, preferably on a TRUE TRANSPARENT ALPHA background if the selected Ideogram model supports it; otherwise use a single pure white background for easy removal. NO checkerboard pattern, shirt, garment, person, mockup, product scene, border rectangle, extra slogans, watermark, or signature. Prefer 5:6 portrait composition for POD. Target 4500 × 5400 pixels at 300 DPI only when the platform/export workflow permits; do not assume native SVG output. After generation, verify spelling and transparency, then vectorize using color-layer tracing and manually inspect/edit paths before selling as SVG.

246 | DEAD INSIDE, FESTIVE OUTSIDE

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “DEAD INSIDE, FESTIVE OUTSIDE”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is bold irreverent cartoon charm, visually expressed through a crescent moon with an exaggerated expression and distinctive personality. Add a secondary candle and a few restrained cheerful skeleton details only where they strengthen the joke. Use clean flat geometric editorial illustration with a striking asymmetrical headline, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as arched headline over a large expressive central mascot, with a short bottom ribbon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: black, antique ivory, burnt orange, and olive; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

SVG-READY GEOMETRY REQUIREMENTS

VECTOR CONSTRUCTION LOCK — Create a true flat 2D vector-illustration LOOK built exclusively from simple, CLOSED, NON-OVERLAPPING OR CLEANLY LAYERED SHAPES with SOLID COLOR FILLS and optional uniform solid strokes. 247 | SKELETON CREW CHRISTMAS PARTY

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “SKELETON CREW CHRISTMAS PARTY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is dry deadpan sarcasm, visually expressed through a candle with an exaggerated expression and distinctive personality. Add a secondary cheerful skeleton and a few restrained black holly details only where they strengthen the joke. Use classic tattoo-flash inspired vector drawing with ornamental stars, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as bold stacked typography occupying two-thirds of the layout, with a mascot tucked into the lettering. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: hot pink, turquoise, butter yellow, and plum; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

248 | BONE TO BE MERRY

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “BONE TO BE MERRY”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is cheeky and mischievous humor, visually expressed through a cheerful skeleton with an exaggerated expression and distinctive personality. Add a secondary black holly and a few restrained crescent moon details only where they strengthen the joke. Use retro grocery-package illustration with quirky anthropomorphic props, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a circular seal with an offset character breaking the border and small curved supporting shapes. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: cranberry red, cream, forest green, and coal black; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

249 | MERRY CRYPTMAS

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “MERRY CRYPTMAS”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is playful exhausted-adult energy, visually expressed through a black holly with an exaggerated expression and distinctive personality. Add a secondary crescent moon and a few restrained candle details only where they strengthen the joke. Use hand-lettered punk zine graphic translated into clean solid vector shapes, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a diagonal headline slicing through an oversized illustrated icon. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: pumpkin orange, bone white, midnight navy, and sage green; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.

250 | I HAVE A SKELETON IN MY STOCKING

Create a premium, original, print-focused vector-style graphic for the Dark Humor Holiday Edition collection. The ONLY readable words in the finished artwork must be exactly: “I HAVE A SKELETON IN MY STOCKING”. Reproduce every character, apostrophe, comma, and word in that slogan precisely; do not paraphrase, repeat, invent subtitles, or add decorative pseudo-lettering. The central creative idea is deliberately awkward festive comedy, visually expressed through a crescent moon with an exaggerated expression and distinctive personality. Add a secondary candle and a few restrained cheerful skeleton details only where they strengthen the joke. Use art-deco holiday emblem with stepped borders and elegant geometric ornaments, but execute the entire piece as polished flat-color illustration with deliberate clean contours, confidently shaped highlights, and no photographic realism. Build the composition as a centered crest featuring mirrored corner accents and a playful asymmetrical mascot. Give the first important words the largest type, use a complementary smaller font for the remaining words, and manually balanced kerning with strong optical alignment. Color palette: electric purple, acid lime, warm ivory, and deep charcoal; no other major colors. Create dramatic contrast, clear hierarchy, and an immediately recognizable silhouette. The design should feel like a clever independent illustrator made it specifically for a holiday shirt rather than generic stock clipart.
